

USE DASHBOARD NODES FOR CREATING UI(WEB APP)

Team Id	PNT2022TMID51591
Project Name	Real-Time River Water Quality Monitoring and Control System

- If you design a proper and modern UI dashboard, it will give the users easy access to the information they need.
- For this to happen, the dashboard information needs to be easy to scan and contain only the key information.
- But, with many tools available, it can be hard to make the right choice or not exaggerate with the use of features.
- This is one of the many roles of a UX designer and as such, it demands

knowing certain tricks to be handled the right way
